Subject: AreaRea Result Graphs

Hi All,

I've finished pulling all the graphs from the VIPER website. I saved them all by location – AreaRAE S/N here: H:\Ames Warehouse Fire\VIPER Graphs

A few things to note:

-If the O2 line skewed the graph at all, I took it off to get better detail in the other lines. So you'll see it on some and not others...doesn't mean anything, just making things easier to look at.

-Adobe stopped being nice to me with editing the name of the graph so you'll see 2 different headers depending on if I could change it easily or not. Obviously, I will clean this up once we figure out what we're doing with these.

The graphs of concern are a few of the background graphs that have a few blips, and the graph from the Source Area Perimeter (S/N 500657) from 1024 1340 thru 1025 0000 has the HCN hit.
